**SUMMARY**

Software Engineer and PHP/Laravel Developer with 5+ years of experience developing web applications, ERP/POS systems, CRM platforms, REST APIs, and multi-branch business solutions. Experienced in PHP, Laravel, MySQL, JavaScript, Docker, CI/CD, payment integrations, and database optimization. First-Class Honours graduate in Computing Information Systems from the University of Greenwich.

**TECHNICAL SKILLS**

- **Languages & Frameworks**: Proficient in PHP, Laravel, JavaScript, jQuery, CSS, HTML, and Bootstrap. Experienced in developing RESTful APIs and creating custom WordPress themes, plugins, and template files.
- **Frontend Technologies**: Intermediate skills in JavaScript frameworks (Vue.js, React) and CSS frameworks (Tailwind CSS, Bootstrap).
- **Database Management**: Experienced in MySQL, Firebase, and Oracle, with expertise in index optimization and query performance tuning.

- **Version Control**: Hands-on experience with Git, GitHub, and GitLab for version control and collaboration.
- **Project Management**: Strong project management skills, with attention to detail and analytical problem-solving capabilities.
- **Hardware & Operating Systems**: Knowledgeable in computer hardware and operating systems, including Windows and Linux (Ubuntu).
- **Enterprise Solutions**: Experienced in creating project flow diagrams for Enterprise Resource Planning (ERP) systems.

## WORK EXPERIENCE

**Nov 2024 –Sept 2026**

**EAXY4U CO., LTD. Bangkok, Thailand**

**Role – Software Engineer**

- Led the development and deployment of a multi-branch **ERP, Accounting, and HR system**, supporting centralized business operations.
- Developed a centralized **CRM and Customer Loyalty platform**, including **customer management, memberships, loyalty points, rewards, campaigns, reservations, referrals, and customer portal**, with secure **REST API and POS integrations**.
- Designed and implemented **Stripe Connect and PromptPay QR payments** for multiple restaurants, including payment tracking, webhook handling, reconciliation, and branch-level reporting.
- Managed production infrastructure using **Docker Swarm**, including load balancing, selfhealing services, and zero-downtime deployments.
- Designed and implemented **CI/CD pipelines** for automated deployments and reliable application rollbacks.
- Implemented **centralized logging and monitoring** to improve troubleshooting and incident resolution.
- Optimized **MySQL queries, indexing strategies, and complex database operations** for improved performance and scalability.
- Designed and implemented **automated payroll, attendance, and financial reconciliation workflows**, improving operational efficiency and accuracy.
- Implemented **multi-branch data management and role-based access control (RBAC)** to securely manage users, branches, and business data.
- Improved system security using **Nginx/Traefik reverse proxy, SSL, rate limiting, and traffic filtering**.

Dec 2022 – Oct 2024

**HTUT Company Media & ICT Solution**

**Role – Web Developer**

- Maintained and enhanced the e-commerce website, integrating new features.
- Tested web applications for functionality and usability.
- Researched emerging technologies and created project flow diagrams (e.g., ERP systems).
- Assisted senior developers in adapting to project needs.
- Led the development of the "Lucky Charm" website.
- Developed an ERP/POS software system.

**Oct 2022 – Nov 2022**

**HeySara IT Team** (Singapore) **Role –**

**Web Developer**

- **Website Maintenance & UI Design**: Managed and enhanced the website's pages, improving the user interface through PHP, HTML, CSS, and JavaScript.
- **Backend Enhancements**: Developed new backend functions using the Laravel framework, integrated Ajax for dynamic interactions, and implemented custom filtering/search functionalities in Laravel Yajra Datatables.

**Jan 2021 – Apr 2022**

**IT & Design Department at ESC Myanmar**

**Role – Web Developer**

- Developed and maintained **WordPress websites**, including **custom themes, templates, and plugins**.
- Built **responsive web pages** using **HTML, CSS, Bootstrap, and JavaScript**.
- Collaborated with the team on project planning, development, testing, and debugging.
- Created website mock-ups and implemented improvements based on client requirements.

**Jan 2020 – Jul 2020**

**PHP Developer (OJT) at Myanmar IT Bootcamp**

- Trained in **PHP and Laravel** through hands-on web development projects.
- Developed **individual and team-based web applications** using PHP and Laravel.

**EDUCATION**

- BSc (Hons) Computing Information Systems (April 2020 – Feb 2022) (University of Greenwich )
- Level 5 Diploma in Computing (2018 June – 2020 July)
  (NCC Education UK)
- Diploma in Network Communication (2017 July – 2018 April)

(Yangon University of Distance Education)

- Diploma in Information Technology (2016 May – 2017 Jan)
  (Yangon University of Distance Education)
- Certificate in Networking (2017)
- PHP Web Developer Bootcamp (2020)

## PROJECT EXPERIENCE

2019 - 2024

**ERP/POS Software** — PHP, CodeIgniter, jQuery, Vue.js, MySQL
Developed ERP/POS features for business operations, sales, purchasing, inventory, and reporting.

**Lucky Charm Monetization Platform** — PHP, Laravel
Developed web application features and backend functionality using the Laravel framework.

**Movie Ticket Booking System** — Laravel
Developed as a final-year university project using Laravel.

**E-Wallet Blockchain System** — React.js, Java
Developed an e-wallet application using React.js and Java.

**Frontend Web Applications** — React.js, Vue.js, Firebase
Developed projects including an e-commerce dashboard, live chat system, project planner, and Netflix-style application.

## BUSINESS SKILLS

- Information System Analysis
- Business Analysis
- DSDM, Agile Methodology
- Information Requirement Management
- Project Management
- Human-Computer Interaction
- Information and Content Management
